BASE Gandhinagar, Gujarat, India

Delivery approach: from strategy to measurable business impact

12+ years in engineering and delivery leadership

40+ engineers led across AI, cloud, QA and DevOps

$2.8M revenue verticals built in FY 2024–25

6 SaaS products shipped to market

20+ enterprise programs delivered

4 regions served: USA, UK, Europe, South Africa

EXECUTIVE SUMMARY

Ruturaj Maniyar turns technology investment into measurable business outcomes, bridging the gap between boardroom strategy and engineering execution.

With more than twelve years of experience, Ruturaj leads delivery for agentic AI, digital health, IoT and telecom programs. As Director of Growth & Delivery at DXFactor Solutions, he heads a cross-functional team of 22+ across pre-sales, delivery and a Centre of Excellence.

Previously he led 40+ engineers at Azilen Technologies, and in FY 2024–25 built AI, Data Engineering and IIoT verticals worth $2.8M with a team of 20+. His foundation in carrier-grade telecom architecture gives him the depth to make sound technical calls, and his client-facing work across four regions gives him the judgment to align them with business goals.

AT A GLANCE

Current role	Director of Growth & Delivery, DXFactor
Experience	12+ years, engineer to director
Team scale	Up to 40+ engineers
Industries	Healthcare, telecom, aviation, defence, IoT, HR tech
Global reach	USA, UK, Europe, South Africa
Credentials	B.E. Computer Engineering; Certified ScrumMaster

LEADERSHIP VALUE

What stakeholders can expect

A leader who speaks both languages: commercial outcomes for the business, and engineering rigour for technology teams.

FOR BUSINESS LEADERS

Value to the business

- **Predictable delivery.** Sprint predictability improved by 30% through KPI-driven governance and delivery risk modelling.
- **Revenue growth.** Built verticals worth $2.8M and led pre-sales solutioning for multi-million INR AI initiatives.
- **De-risked investment.** Proof of concept first, so budgets back what is proven to work.
- **Global alignment.** Stakeholders and distributed teams kept in step across four regions.

FOR TECHNOLOGY LEADERS

Technical leadership

- **Architecture depth.** Microservices, event-driven and domain-driven design, multi-tenant SaaS.
- **Applied AI in production.** LLMs, RAG and agentic workflows on AWS Bedrock, beyond the demo stage.
- **Carrier-grade reliability.** Platforms at 99.95% uptime; voice AI latency reduced by 35%.
- **Talent development.** Hiring, performance management and mentoring engineers into leads.

OPERATING PRINCIPLES

Prove it small, then scale

Pilots settle debates faster than slide decks, and protect budgets.

Predictability is respect

Clients and teams deserve to know what is coming.

AI assists, people decide

Automation with a human accountable for every outcome.

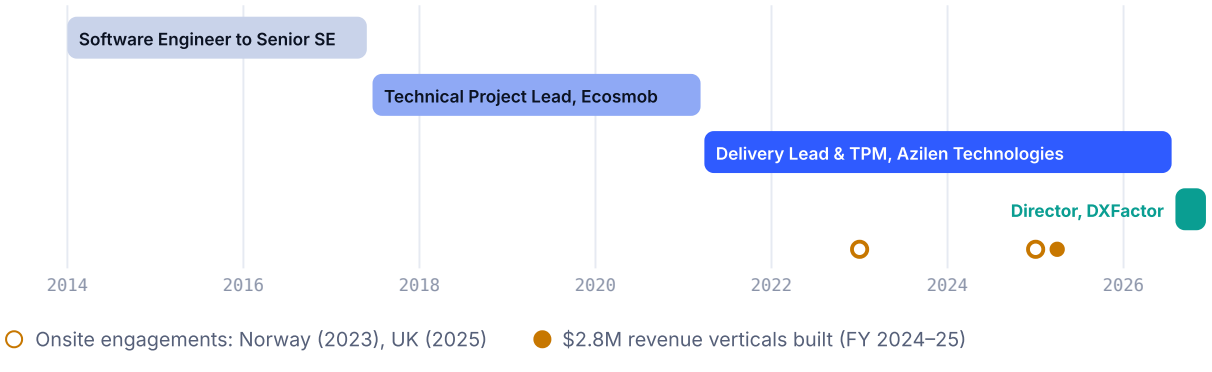

Grow people, not headcount

Strong leads are the real scaling strategy.

CAREER TRAJECTORY

From engineer to director

Twelve years of steady progression across telecom, IoT, healthcare and AI, with each role adding scale, scope and commercial responsibility.

ROLES IN DETAIL

Responsibilities and results

Scope and key results in each role, with the global reach and industry breadth built along the way.

AUG 2026 — PRESENT · CURRENT

Director of Growth & Delivery

DXFactor Solutions, Ahmedabad

- Leads a cross-functional team of 22+ across pre-sales, delivery and a Centre of Excellence.
- Delivers agentic AI, healthcare and fitness solutions for global clients.
- Builds rapid proofs of concept that validate use cases before full investment.

APR 2021 — JUL 2026 · 5 YRS 4 MOS

Delivery Lead & Technical Project Manager

Azilen Technologies, Ahmedabad

- Led 40+ engineers across IoT, agentic AI and data engineering programs.
- Improved sprint predictability by 30% through KPI-driven Agile governance.
- Shaped hiring, technical roadmaps and pre-sales architecture for multi-million INR AI initiatives.

JUN 2017 — MAR 2021 · 3 YRS 10 MOS

Technical Project Lead

Ecosmob Technologies, Ahmedabad

- Architected a multi-tenant Hosted PBX for 1,000+ concurrent users at 99.95% uptime.
- Designed Class 4/5 SIP switching for high-volume international carrier routing.
- Cut client provisioning time by 50% with automated CI/CD.

2014 — 2017 · FOUNDATION

Software Engineer to Senior Software Engineer

Concepts Iconnect (Flinnt), Ecosmob, MageMad, Panamax InfoTech

- Hands-on engineering in PHP, telecom and product development.
- Built the technical grounding that underpins his leadership today.

Global delivery footprint

USA · **UK** · **Europe** · **South Africa**

Sweden & Norway	Six months onsite leading solution workshops and ERP integration for autonomous logistics platforms.
London & Cambridge	Six months onsite managing enterprise UAT, stakeholder governance and digital transformation.

Industries served

Healthcare & RCM · Telehealth · Telecom & UCaaS · IoT & wearables · Aviation robotics · Defence & safety · Fitness · HR tech · Logistics

Products led

Rootle AI, voice AI agent platform

LoyaltyXpert, retention SaaS

Hosted PBX, UCaaS

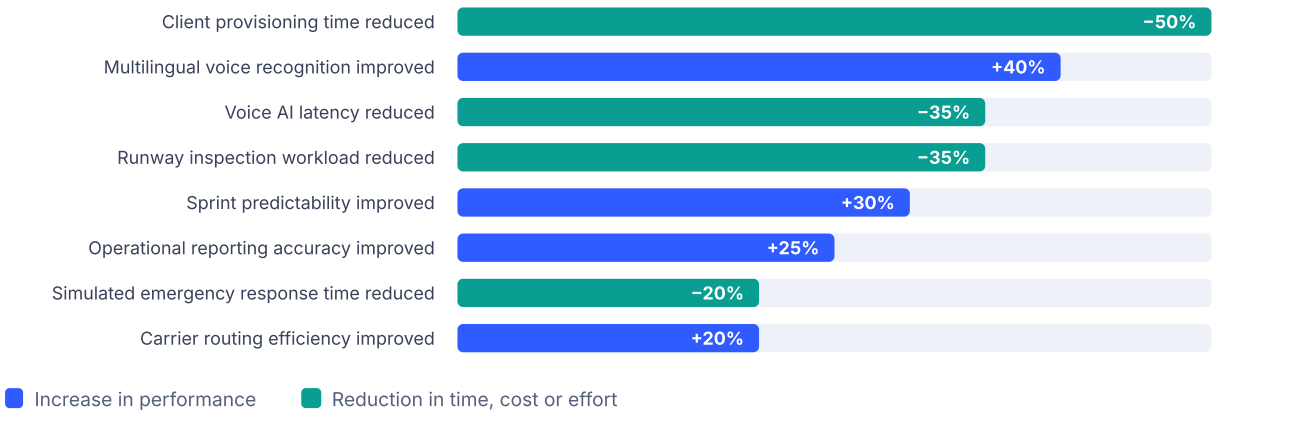

MEASURED IMPACT

Selected business cases

Representative programs, each summarised as the business challenge, the approach taken and the outcome delivered.

Improvement delivered across programs

Percentage change against the baseline on each program

GENERATIVE AI / IOT

AI Voice Command Platform

10K+
commands a day

Challenge	Understand voice commands across languages and act on them in real time, at production volume.
Approach	Microservice voice AI joining speech recognition and LLM pipelines, with event-driven orchestration.
Outcome	Recognition accuracy up 40%, latency down 35%.

HEALTHCARE / RCM

Digital health platform, 0 to 1

0→1
discovery to launch

Challenge	Give clinics one platform for consultations, operations and revenue cycle work, without added admin.
Approach	Owned product direction from clinical workflow discovery; revamped RCM with an agentic AI layer.
Outcome	Telehealth and clinic management launched with Hub & Spoke support.

DEFENCE & SAFETY / IOT

AI wearable for first responders

5K+
vitals events a minute

Challenge	Stream field personnel's vital signs to command teams in real time, with zero tolerance for downtime.
Approach	Real-time telemetry pipeline, predictive alerts and secure cloud-edge architecture with failover.
Outcome	Simulated emergency response time cut by 20%.

AVIATION ROBOTICS

Autonomous runway inspection

−35%
inspection workload

Challenge	Reduce the safety risk and effort of manually inspecting runways for foreign object debris.
Approach	End-to-end architecture from robot edge devices to a central operations engine.
Outcome	Reporting accuracy up 25%.

TELECOM / UCAAS

Hosted PBX and carrier switching

99.95%
platform uptime

Challenge	Telephony for enterprises and carriers that scales per tenant and stays available.
Approach	Multi-tenant Hosted PBX, Class 4/5 SIP switching and CI/CD provisioning.
Outcome	1,000+ concurrent users; routing efficiency up 20%; provisioning time halved.

BUSINESS GROWTH

$2.8M in new revenue verticals

In FY 2024–25, built AI, Data Engineering and IIoT verticals worth $2.8M, led by a team of 20+. Also led Rootle AI, a voice AI agent platform, and LoyaltyXpert, a multi-tenant retention SaaS.

CAPABILITIES

Expertise and operating approach

Broad enough to lead an entire program, and deep enough to review its architecture.

AI

Generative & agentic AI

- LLMs
- RAG
- Agentic workflows
- Vector databases
- Prompt engineering
- Model-driven development

LEADERSHIP

Delivery & growth

- Team scaling
- Agile governance
- Executive communication
- Pre-sales consulting
- Hiring & mentorship
- Vendor management

ARCHITECTURE

Distributed systems

- Microservices
- Event-driven design
- Domain-driven design
- High availability
- Multi-tenant SaaS
- WebRTC & SIP
- IoT edge

CLOUD

Cloud & DevOps

- AWS Bedrock
- Lambda
- EC2, S3
- SQS, SNS
- Docker
- Jenkins CI/CD

ENGINEERING

Languages & data

- Python
- Node.js
- TypeScript
- PHP, Laravel, Yii
- PostgreSQL, MySQL
- DBT

DOMAINS

Industry knowledge

- Healthcare & RCM
- Telehealth
- IoT & wearables
- Telecom & UCaaS
- Aviation robotics
- GDPR-ready systems

Education: Bachelor of Engineering in Computer Engineering, Gujarat Technological University (2014). Certification: Certified ScrumMaster (CSM).

Strategic priorities, 2026 to 2028

Focus areas for the next phase of growth, at work and in the community

IN PROGRESS, 2027

AI Centre of Excellence programs

Structured AI learning paths for teams and clients.

2027

Publish an e-book on AI delivery

Twelve years of delivery practice, codified for leaders adopting AI.

2027

AI education in the community

Teaching AI to students through an NGO, and a free coding camp for girls.

2027–28

Global thought leadership

Speaking at industry conferences and expanding engagement with US clients.

Partnering on your next technology initiative

Available for conversations on AI programs, delivery transformation, and scaling engineering teams that deliver measurable results.
